

FOREST INVENTORY ANALYSIS

GEORGIA FORESTRY
COMMISSION

Note about county data consistency: While state level data remains consistent and consistently accurate, county level data queries made prior to February 2007 will vary from current year county level data queries of the same data. This is due to changes in the methods used by the U.S. Forest Service to compile the data to comply with national standards. Due to large plot expansion factors (1 plot for ~6,000 acres) and the relatively small acreage of most counties, county level forest data has always had a high standard error (but is often used since it is the only data available). Ideally, a minimum of several counties should be used for data queries. However, individual county data can be used as long as the limitation of the data are realized.

2008 FIA Data from Forest Inventory Data Query Tools
Estimated Georgia Forestland Acreage by County and Ownership Group

	Ownership group
