Harvest Description:

General Information
- This sale area consists of approximately 555.6 acres of planted slash pine that varies in age from 1970 to 1986.
- Property line sale boundaries are marked with teal marking paint. Do not cut boundary trees unless they have an “X” on them. Do not cut hardwood drains/depressions that are “out” on the activity map. However, harvest all pine around the edges without rutting.
- Harvest all merchantable timber from sale area. Cut or knock down all timber > 5" DBH.
- Stands will be surrounded by hardwood bottoms, firebreaks, roads, or marked sale boundaries.
- Do not skid trees in or across roads unless it is mutually agreed upon.
- Avoid dropping trees in roads, firebreaks, or existing wildlife openings. Debris that falls in any of these cleared areas should be cleaned out.
- The thinning area surrounds the public shooting range. The range is open only to law enforcement use on Mondays. Thinning this area would be best if done on Mondays if possible. Operator select thin this area down to a basal area of 50 ft² per acre. Leave the basal area around 70-80 ft² within 100’ of the range itself to buffer some of the noise. A demo area has been marked to represent the 50 ft² thinning.
- Unmerchantable and/or dead timber can be chipped if the buyer wishes to reflect the price they will pay on the bid sheet.

Streams
Mayhaw is a low and flat area. There is one seasonal channel that drains a low area in the Northwestern most stand. A firebreak crosses this drain on the south end. The area where the firebreak crosses the drain will be flagged. Crossing in this area will be allowed if conditions allow; however, if damage occurs it will need to be repaired by the logger. There are numerous wet depressions existing within the stands and surrounding them. Follow Best Management Practices in these areas. Rutting should be avoided.
