

Georgia Certified Mills & Products

During a 2012 survey of the primary wood-using industries in Georgia, the following companies reported to GFC personnel that their wood procurement system and/or listed mills and/or products are certified through SFI, FSC, PEFC or Green-Gold¹. Please note that not all mills responded to this question and there may be other Georgia mills producing certified products during primary processing. Questions about specific certification programs, claims or product labels for individual mills should be directed to those mills.
