Dear Directory User:

The Georgia Forestry Commission is pleased to bring you the *2020 Georgia Primary Wood-Using Industries Directory*. The Directory is designed to serve as a reference for producers seeking to market their wood products and for wood users in locating suppliers.

The forest products industry remains a strong economic force in Georgia. Our latest study of the industry shows an increase in economic output from 2017 to 2018. The total direct and indirect impact of the forest industry on Georgia's economy in 2018 increased .9% to \$36.3 billion, with a total of 148,414 jobs. Forestry ranked first among all industries in the state in wages and salaries, with \$4.0 billion paid.

Georgia's commercial forest totals 24.5 million acres that are sustainably managed primarily by private landowners. This forest should continue to supply solid wood and fiber to a strong forest industry for decades into the future. The Commission's staff is working to insure that Georgia firms invest in Georgia wood product manufacturing as globalization places increasingly competitive demands on the industry. Creating enhanced forest value by marketing Georgia's products through this Primary Wood-Using Industries Directory is an important part of our mission.

The Georgia Forestry Commission invites new and existing Georgia forest product industries to be included in future editions of this directory by contacting us at 1-800-GA-TREES. I also invite your comments on how the Georgia Forestry Commission can better provide the right services to you, a valued partner in Georgia's forest industry.

Sincerely,

Gary White  
Deputy Director

Companies that Export	pg. 80
Urban Wood-using Mills	pg. 102
Companies by County	pg. 108
Index	pg. 117

# Georgia Primary Wood-Using Industries Directory 2020

## Preface

This publication is the 2020 directory of primary manufacturers of forest products in the state. It is a marketing guide to maximize global competitiveness of Georgia grown and manufactured wood products. The directory can benefit persons or firms, both interstate and intrastate, seeking to buy or sell specific items.

The information contained in this directory is as up-to-date as possible. Data was collected in early, 2020. Data entry and editing occurred in mid-2020. A comprehensive effort was made to locate and interview all qualifying companies. This directory contains information on primary industries only – mills that process roundwood in log or bolt form or as chipped roundwood.

A **Georgia Counties** and **Mill Location Map** is provided to assist with referencing mill locations.

**Companies by Type of Business** provides information such as company name, mail address and location, telephone and fax number, email and website, the type of business in which the company is engaged, products, by-products, species of wood used, and manufacturing facilities. In some situations, a mill may produce more than one primary product and thus will be listed in more than one section. An alphabetic character denotes a particular size class based on employment.

### Employment Size Class:

A = 1-3	D = 20-49	G = 200-499
B = 4-9	E = 50-99	H = 500-999
C = 10-19	F = 100-199	J = 1000 +

**Companies that Export** lists mills that export their products.

**Companies by County** lists mills by county of location and type of business along with the related page number in the type of business listing.

The **Index** is an alphabetical listing of companies and their related page numbers.

**Appendix A – Commercial Tree Species** is a list of tree species by common and scientific Latin name.

**Appendix B – Forest Industry and Product Search Tools** provides links to several online databases.

The 2020 Directory and Mill Location Map and 2020 Wood Using-Industries Directory are available for download at <http://www.gatrees.org/resources/directories/wood-using-industries/>. In addition, the Wood Using Industries Online Directory, a searchable database of primary and secondary mills and the products they produce, can be found at <http://www.gatrees.org/resources/directories/>.

The Southern Group of State Foresters (SGSF) maintains an online searchable database of both primary and secondary wood using industries that can be found at <http://forestproductslocator.org/welcome>.

In addition, companies looking to establish operations in Georgia can visit the Georgia Department of Economic Development at <http://www.georgia.org/>.

## **Directory Contact Information**

## **Corrections / Updated Information**

Corrections or updated mill information should be emailed to [dpreston@gfc.state.ga.us](mailto:dpreston@gfc.state.ga.us).

## **Acknowledgments**

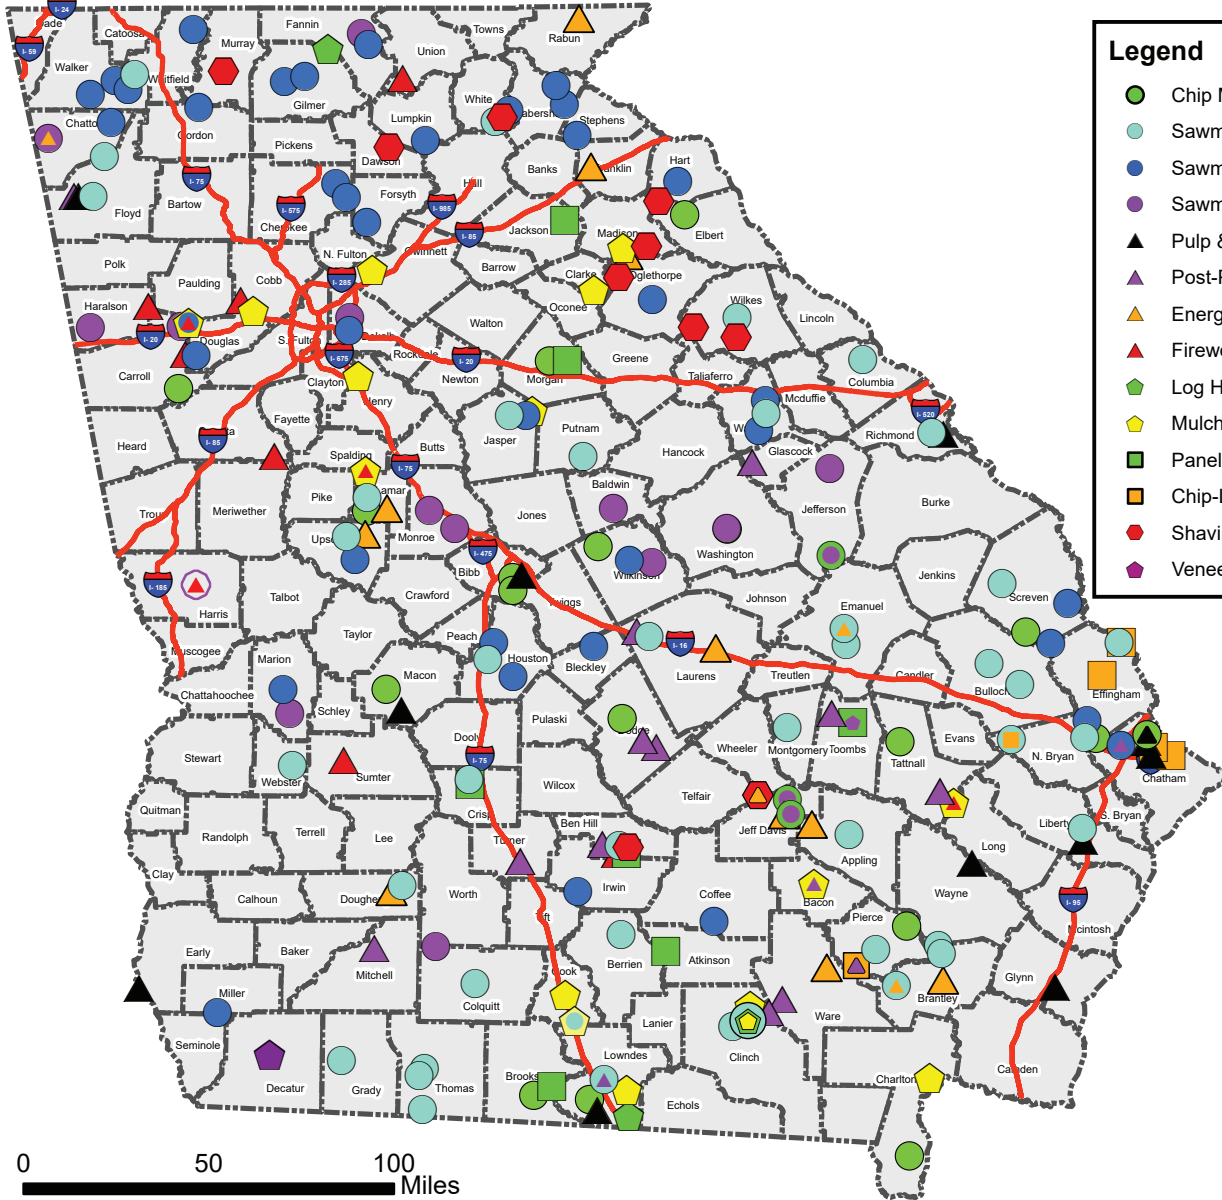

The Georgia Forestry Commission is grateful for the support it received on this project from the companies listed, for without this cooperation, it would not have been possible. Survey data was processed by the Georgia Forestry Commission Forest Utilization staff including Risher Willard, Dru Preston, Billy Whitley, Jonathan Brown and Devon Dartnell. Acknowledgements would not be complete without the recognition of the technical assistance and support provided by Wendy Burnett and Kassie Keck of the Georgia Forestry Commission Communications Department.

## **Disclaimer**

This directory is a list of primary manufacturers operating in Georgia during 2020. It is intended as a marketing guide to bring buyer and seller together where Georgia grown or manufactured products are involved. Attempts were made to locate and interview companies; however, some have changed name, telephone, location or ownership. Omission of a firm is not intended as a reflection against it, nor is inclusion a recommendation. In no event shall the Georgia Forestry Commission be liable for any damages whatsoever (including, without limitation, damages for loss of business profits, interruption, loss of business information, or other pecuniary loss) arising out of the use of or inability to use this product, even if the Georgia Forestry Commission has been advised of the possibility of such damages. In addition, links to other organizations web sites is provided for general information purposes only and does not imply endorsement of their websites, products or organizations by the Georgia Forestry Commission.
