Timber Product Output and Use
Georgia, 2020

Georgia forests accounted for a total of 1,383,131 thousand cubic feet (MCF) of timber products while the forest products industry produced a total of 1,395,847 MCF within the State.

This resource update contains the findings of a survey conducted on a sample of all primary wood-using mills in Georgia. It complements the Forest Inventory and Analysis (FIA) annual inventory of volume and removals. The survey was conducted to determine the amount and source of wood receipts and annual timber product imports/exports. Only primary wood-using mills were surveyed. Primary mills are those that process roundwood in log or bolt form or as chipped roundwood. Examples of industrial roundwood products are saw logs, pulpwood, veneer logs, poles, and logs used for composite board products. Mills producing products from residues generated at primary and secondary processors were not surveyed. Data used in this update were accessed from the FIA Timber Product Output database (see back page).

Georgia had a total production of 1,383,131 MCF in 2020.

There are about 184 primary wood processing mills accounting for production in the State.

Statewide roundwood production (% of total) by product

- Pulpwood: 39.70%
- Saw logs: 37.87%
- Bioenergy/Fuelwood: 10.79%
- Composite panel: 6.02%
- Poles/Posts/Pilings: 2.19%
- Veneer logs: 1.98%
- Miscellaneous: 1.45%

*Misc. includes all roundwood uses not listed

Total roundwood production over time

- Max. Hardwood
- Max. Softwood

Georgia imported 176,056 MCF into the State and exported 163,340 MCF out of the State making them a net importer of roundwood.
Timber Product Output and Use for Georgia, 2020
